

Gaming

The gaming industry in B.C. is unique given the legislative framework, the high degree of regulation and the operation of the gaming facilities through the use of commercial operators contracting with the B.C. Lottery Corporation. It is critical to have legal counsel with experience and knowledge of the gaming industry.

Harper Grey lawyers bring significant experience in helping our gaming clients navigate the business environment. We act for gaming operators, including casino and bingo operators, as well as registered gaming management companies and gaming associations. We include among our clients both the largest casino operator and bingo operator in British Columbia. We are also involved in working with the B.C. Lottery Corporation and the provincial government in their roles within the gaming industry. We not only advance the interests of our clients, but also help them understand and adapt to changing regulations.
