**HARPER GREY CHOOSES NETDOCUMENTS
CLOUD-BASED CONTENT MANAGEMENT
PLATFORM**

July 10, 2018

We are excited to announce that Harper Grey has chosen NetDocuments for its next-generation cloud-based document management system, the first law firm in Vancouver to do so. “This highly sophisticated and advanced cloud technology will foster a transparent client experience through enhanced collaboration tools and a flexible and intuitive end-user experience”, notes [Dharam Dheensaw](#), Harper Grey’s Chief Information Officer. “The transition to NetDocuments will not only improve our internal document and filing efficiencies, but will also enable the firm to move from a static document repository to a dynamic, feature-rich knowledge management solution that enables us to work more efficiently.” Learn more about NetDocuments by visiting their [blog here](#).
